# Our Story

---

In this interconnected world, HODL is presenting a new digital asset. A cryptocurrency called HODL was created using cutting-edge blockchain technology. The phrase "Hold on" for "hold on for dear life" traders are elevated by HODL. To generate rewards and sanction production without autonomous friction, HODL is developing a protocol. The community-driven HODL project is based on the Binance smart chain. You will receive more if you keep a HODL in your wallet. People can CPU mine HODL currency, and rewards are earned on balances that are currently active.

However, HODL can also be kept away from the term to earn more. Comparing several of the available FIAT currency options to cryptocurrencies, HODLing could lead to far more steady maintenance of value. Due to its extremely low supply and predictable, decreasing inflation rate over time, owning cryptocurrencies could therefore be a wise decision.

Investment in new projects can be riskier than purchasing well-established cryptocurrencies like bitcoin and Ethereum, however, HODLing can offer excellent returns.

# Our Mission

HODL charges a tiny tax on each buy, sell, or transfer transaction to pay for a \$BNB reward pool that will be used to sustainably increase payouts. The capped reward pool ensures that the benefits for its clients are protected even if volume declines and are increased during growth periods. The buyers will continue to receive benefits as long as they hold. The \$BNB reward pool idea from HODL has received attention since it uses an adjustable cap to ensure sustainability, protecting awards when volume declines, and generating a sustainable and long-term source of passive income for all holders.

At HODL, we take great pride in our commitment to innovation, safety, and transparency. Since there are no centralized controls or reporting requirements for the activities that take place in this sector,

rug pulls typically occur in the decentralized finance (Defi) ecosystem, but there is no danger of this happening with HODL. Our goal is to create a secure and safe environment.

# Our NFTs

## What is NFT and why is it important?

A mechanism to store bitcoin (more precisely, Ethereum) as a digital asset is made available through an NFT. An NFT offers investment potential in that it might increase in value more quickly and considerably than an equivalent position in bitcoin, similar to using money to purchase actual property (like real estate).

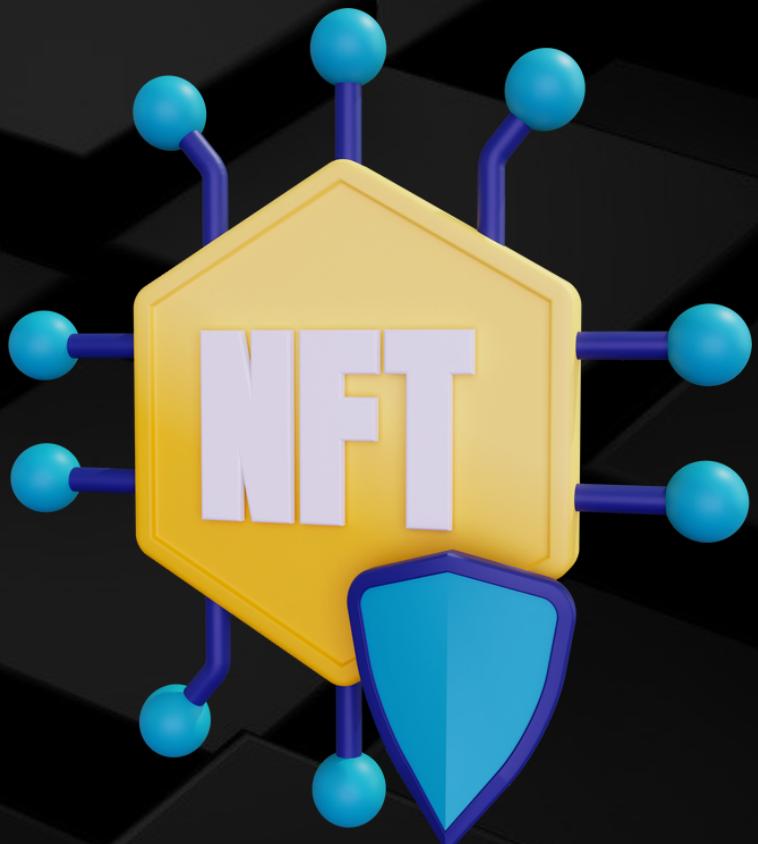

## How long should you hold on to an NFT?

An NFT is a long-term investment if you intend to hold it for at least a year before selling it.

## Is NFT a good long term investment?

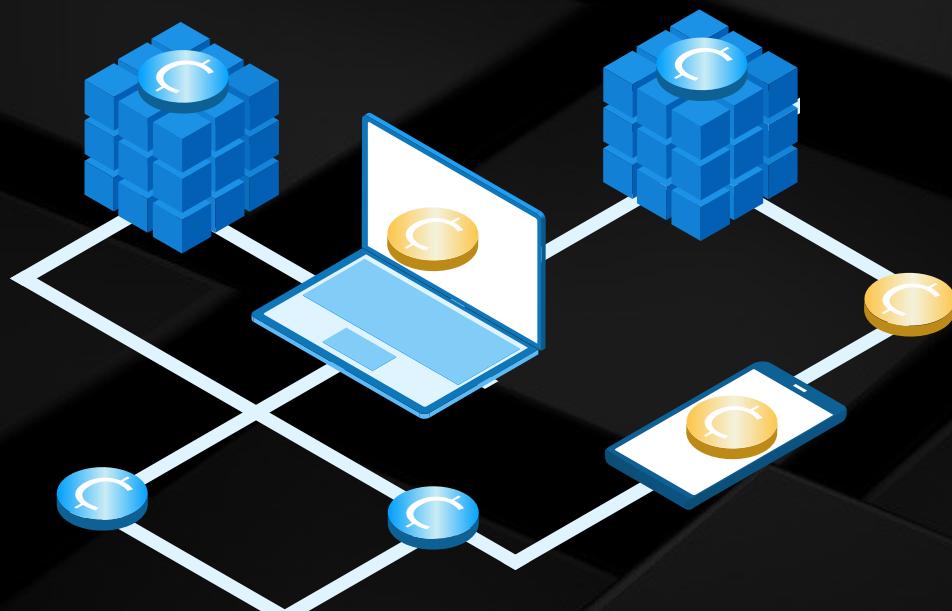

You are thinking about making a long-term investment rather than trying to make quick cash, become wealthy over night, or acquire wealth in this developing market. However, if you believe that NFTs are the way of the future because they democratise access to art ownership, they make good investments.

# Tokenomics

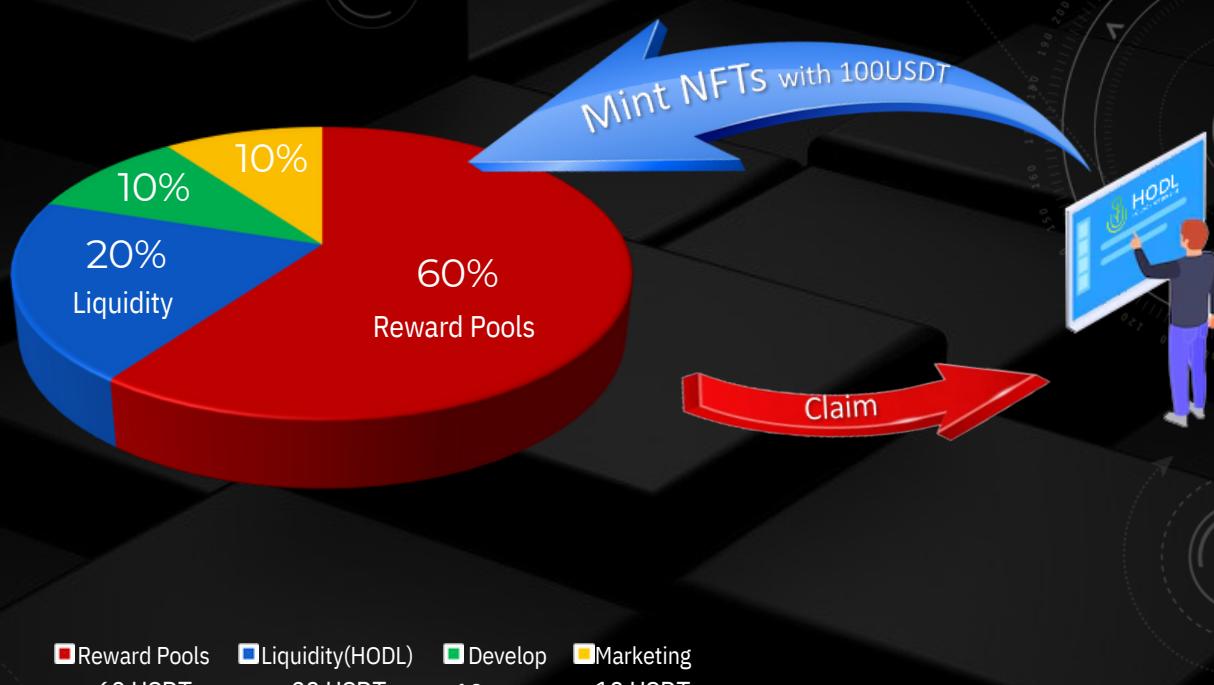

The incentives that attract investors to purchase and keep a particular coin or token depend on the way a cryptocurrency's economy is set up. We may use our tokenomics as a guide to determine the potential future value of our project. While preparing tokenomics, we considered the usefulness of HODL. The selling fee will be subject to a 5% tax.

Token Name:	Hold On for Dear Life
Token Symbol:	HODL
Current Total Supply	100M
Initial price	\$0.01
Blockchain:	Binance Smart Chain(BEP20)

# Token Distribution

Tokenomics research includes token distribution as a key component. It details the percentages in which various user and investment groups own various blockchain tokens. Token distribution can be seen as a pie chart, with each piece signifying a particular group's ownership of the project.

# WorkFlow

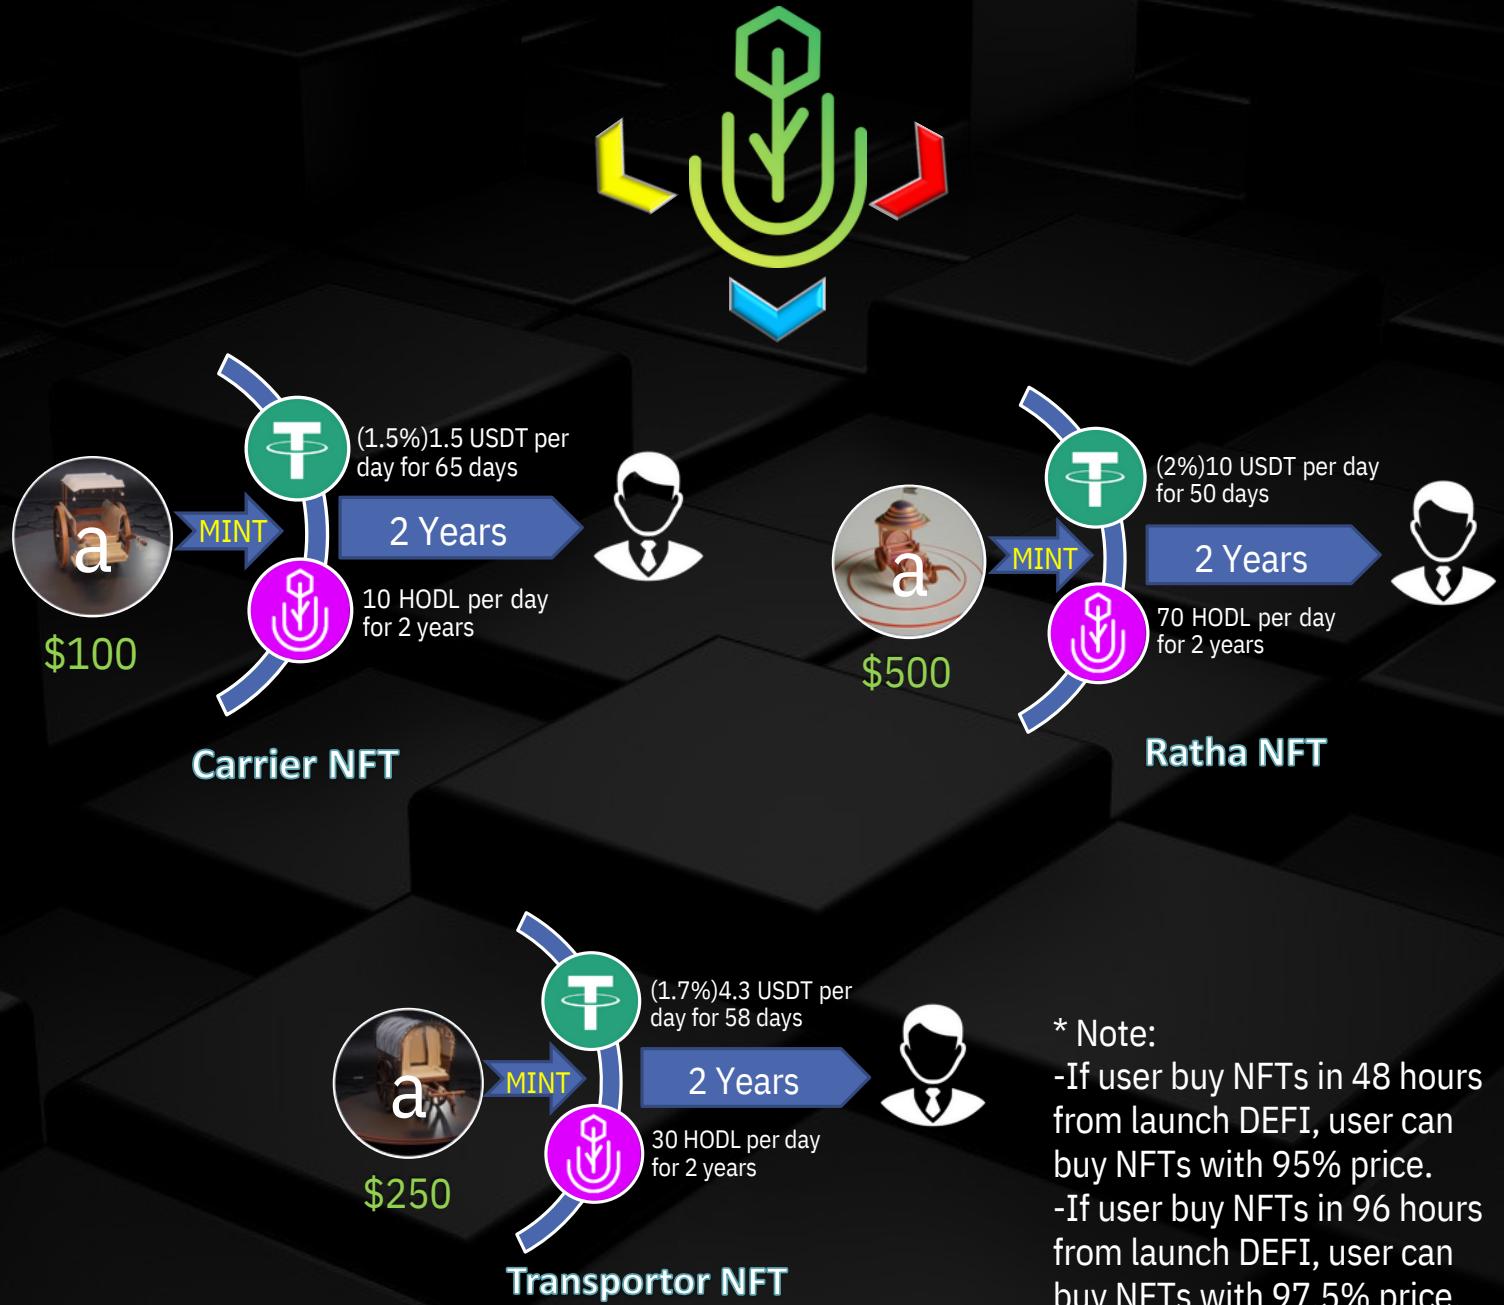

---

- If the user buys NFTs 48 hours from the launch DEFI, the user can buy NFTs at a 95% price.
- If the user buys NFTs in 96 hours from the launch of DEFI, the user can buy NFTs at 97.5% price.
- You will start by minting Carrier NFTs of \$100 for 2 years 10 HODL per day. Then you will move on to the transportor NFT of \$250 for 2 years 30 HODL per day and you'll get 4.3 USDT per day for 58 days. Or you can go for Ratha NFT worth \$500 there you'll have 70 HODL per day for 2 years and you'll get 10 USDT per day for 50 days.

## Buying & Selling

# FAQS

---

# HODL

## HOLD ON FOR DEAR LIFE

### WHAT IS HODL?

The goal of the HODL protocol is to give users stable returns through the usage of NFTs. In the income-generating NFT initiative called HODL, you can mint NFTs and get rewards from reward pools.

### HOW TO BUY HODL?

To make it simple and quick for people to obtain our NFTs, we have devised simple processes. Once you click "Launch App," you can find our NFTs there. This will bring you to our website, where you can buy them under the "Mint" tab. Every month's first will see the release of new NFTs.

## WHAT TOKEN ARE YOUR REWARDS GIVEN IN?

The awarding tokens are necessary for the holding system. People are constantly seeking out the passive benefits that a platform can provide. Our platform is effective, and we give users consistent incentives. Every one of our investors will receive a daily stablecoin reward.

## ARE YOU GUYS SAFE?

Our main concern in this ecosystem is security. We make significant efforts to maintain the security of user information and transactions because it is highly important. We think we've done everything we can to protect our investors, so they should rest easy. This includes having a publicly DOXXED team as well as audited code. Our full safety plan is highlighted in our white paper.

## WHAT IS THE ARTISTIC VALUE OF YOUR NFTS?

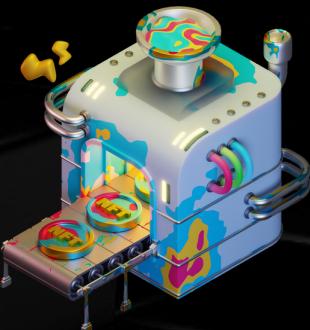

The artistic merit of NFTs determines their demand or worth. Our NFTs are exceptional and have strong artistic qualities. Our NFTs' artistic value varies depending on the tier. If you see any that you like, get in touch with the brand or creator. So that you can locate the greatest NFTs based on your interests.

## WHAT'S THE VALUE OF MAKING THE NFT SELLABLE?

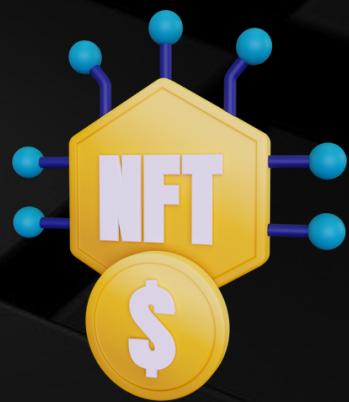

On every site to which they become hooked, people expect access to financial resources. The selling price of NFTs determines their value. The benefit of making sellable NFTs available as soon as they are created is that it allows our users to withdraw their money whenever they choose.

granting users actual ownership so they can sell and mint them whenever they want.

## IS THIS A PASSIVE INCOME PROJECT?

Yes, this is what makes HODL so lovely. We offer our holders a stream of passive income. Due to inadequate planning, many cryptocurrency projects are swept under the rug or abandoned, but not in our project. After purchasing an NFT, you start receiving daily benefits without the user's action. enabling our users to live fully without having to check their laptops all the time.

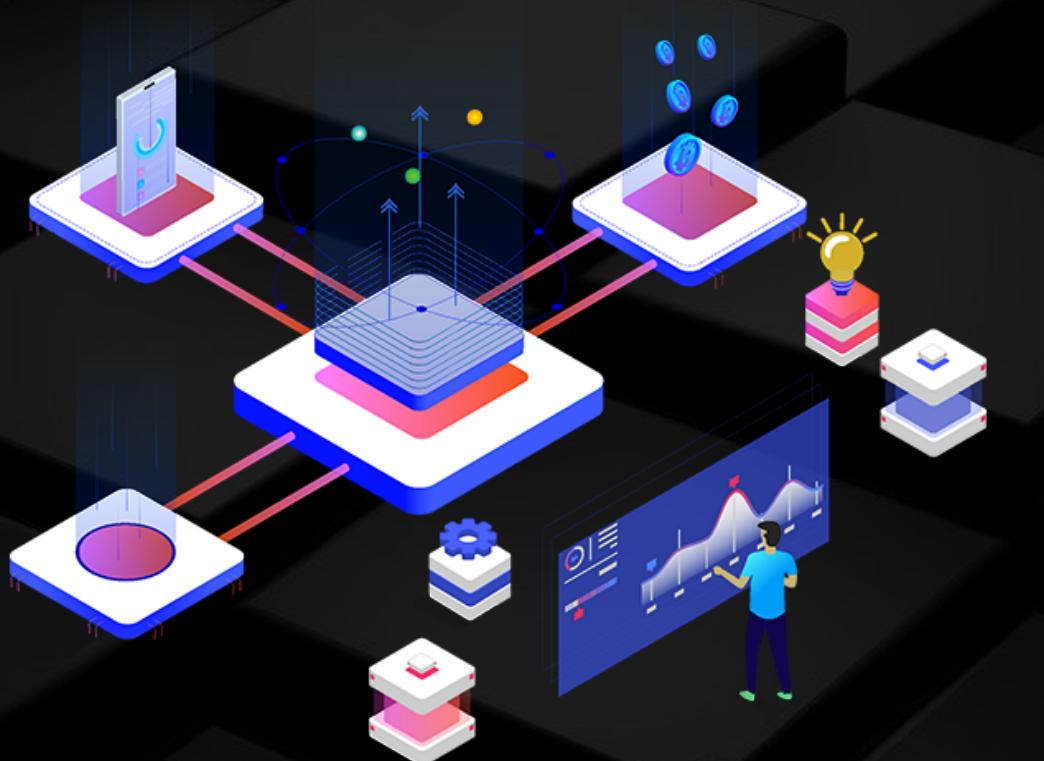

## CAN I INVEST IN HODL FROM ANYWHERE IN THE WORLD?

Yes! One of the many strengths and beauty of cryptocurrency, in general, is this. There are no geographical or national restrictions. From anywhere in the world, you can invest in HODL and reap its effective rewards.

## IS HODL TECHNOLOGICALLY MORE ADVANCED?

Technology and art have a rich but significant history of collaboration and influence. To get to where they are in the world today—the digital age where they continuously overlap and present new ideas—they have, in many respects, grown alongside one another. Art changes along with every new technological advancement. This doesn't, however, only apply to their output.

The manner that art is perceived, communicated, consumed, and subsequently sold is also evolving continually. Art is now much more widely available because of technology. We are celebrating the realization that HODL is just this—a location where finance, technology, and art harmoniously coexist.
