

MAGIC
VENTURES

ABSTARCT

Our company's goal is to create one-of-a-kind cryptocurrency projects free from rug pull, sharks, and crypto whales, paving the way for our crypto and DeFi fans to provide them with a secure, all-inclusive platform, innovative, and transparent auto staking services. Magic Ventures is a fully integrated, decentralized, and cost-effective token staking platform.

INTRODUCTION

Magic Ventures is an auto staking DeFi protocol and \$MGV is the native token of Magic Ventures ecosystem.

Our goal is to construct the entire ecosystem, which will be a compound combination of DeFi, NFT, Lottery, Metaverse, and other technologies.

\$MGV represents a more stable, shark-free, whale free, tax-free, no decrease in value along with rebasing working protocol to give the best more stable and likely to survive than existing centralized and distributed cryptographic forms of money. With \$MGV, you can feel good about witnessing tokens grow in your wallet every 30 minutes, 48 times a day, by rebasing.

MISSION

Our expansion and client base goals are aggressively pursued by empowering newcomers and establishing a strong community commitment to foster trust between the focal and members of our natural environment, keeping our token's price as a motivator by not decreasing the price value each rebasing for our representative holders. The ICO will be the first stage in collecting revenue from \$MGV. Our Presale participants will be able to benefit from our auto staking process, which is a mechanism embedded into the token's smart contract for simplicity. There will be no price decline after rebasing, where supply is algorithmically regulated to keep the price consistent. We aim to have translation programs or local communities to pass information across to non-English speakers by creating other language channels.

VISION

Our organization provides a decentralized area that will encourage newcomers to stay by providing a passive income stream while also giving them a sense of fulfillment that their presence benefits their fellow humans, whether as stage consumers or as dealers. The objective of the Magic Ventures is to provide a secure environment for users by creating a combined ecosystem of DeFi, NFT, Metaverse, and lottery. We will make available to the community all fund addresses (Liquidity, Treasury, Magic Vault, Ecosystem, Burn Addresses) and all transaction hashes in a rug-pull-free environment. We aim to provide a sustainable financial ecosystem for all. We aim to build a plan to give profit to investors in a short time. We aim to pursue our vision to communicate with our users all around the world; that's why we will create other language channels along with adapting various means of channels to promote our platform via Discord, Telegram, Twitter, YouTube, and Medium; therefore lots of people will know ours.

WHY AVALANCHE C-CHAIN?

One of the few blockchains that can scale without sacrificing decentralization is Avalanche. It has a vast range of blockchain compatibility. Depending on the application, avalanche blockchains use a variety of consensus algorithms, and the network has more validators than standard blockchains. To enable cryptographically authenticated, secure, immutable, and durable contract management, C-chain uses public ledgers. The disadvantages of blockchains are eliminated with C-chain.

WHAT DO WE ASPIRE TO BE?

Our firm, Magic Ventures, is dedicated to developing the entire ecosystem, which will include DeFi, NFT, Lottery, and Metaverse. The financial security of a predetermined daily percent rate (or DPR) of 1.9 percent on your token amount is provided by Magic Ventures.

DEFI NETWORK

We utilize the DeFi protocol to provide a truly decentralized experience without snipers, whales, or rug pulls. Users can make trades and move their assets whenever they want without waiting on bank transfers. We created Magic Ventures to provide our holders with tokenomics within the DeFi space.

BENEFITS

- Permissionless.
- Transparency.
- Tokenization.
- Immutability.
- Savings Applications.
- Scalability.
- Uncertainty

METAVERSE INCORPORATED PLATFORM:

Metaverse is the talk of the town now. We intend to establish a unique platform where users do not have to wait for the platform to invest in such an outstanding opportunity to use Metaverse and its facilities, which are definitively not limited to gaming or crypto. We are launching the first Metaverse Game with the utility of the Magic Ventures. Users can also share their ideas and creativeness with creators and developers and be a part of a group that would benefit the Metaverse community of Magic Ventures with new highlights.

NFT AND LOTTERY PLATFORM

NFT is the new crypto emerging and making its situation as time goes on in the universe of articulations. As a rule, NFTs sold as craftsmanships made commonly 12.9 million U.S. dollars in 2020. NFT Marketplace trading volumes overflowed by 1127% beating \$7 million in September. We will increase the usability of tokens through these projects. Users can use the \$MGV in our ecosystem, and when it gets growing and famous, we will integrate ours into the other big platforms. Users with the help of Magic Ventures would be able to buy virtual gadgets on Metaverse and in the real world and even NFTs with complete security of payment.

OUR WORKING PROTOCOLS:

AUTOSTAKING:

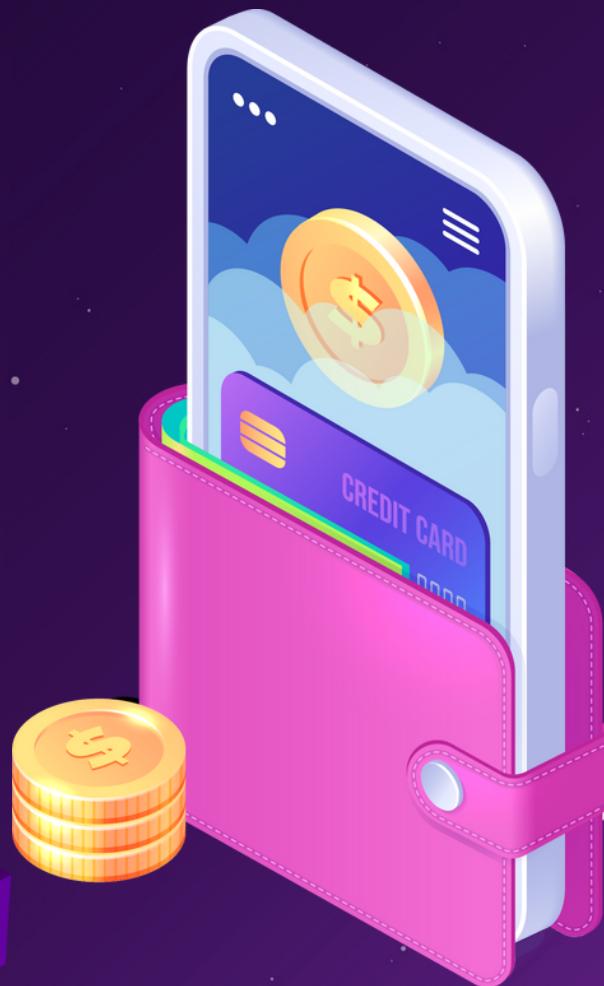

Many coins and initiatives have been launched every day since the birth of blockchain. Of course, they guarantee modest growth before they begin, and they work hard to achieve it. However, not all boats are designed to sail. We need our distinctive approach to safeguard ourselves in this fierce cryptocurrency rivalry. We plan to create a robust ecosystem with an auto staking protocol and other technologies. As you may be aware, the bigger the number of token holders, the higher the token price. Magic Ventures auto staking protocol is quickly becoming a practice of gaining passive income by maintaining its protocols values and uniqueness. Auto staking protocol enables investors to collect staking incentives and allows you to receive submissive profits. If you're interested in earning a passive income by staking and love supporting charities. You will be more resistant to blockchain attacks and capable of processing by committing a percentage of the funds. With \$MGV, token holders can earn a steady income over time.

REBASING OF TOKEN:

We offer our users the benefit of no price decline after the token is rebased. Rebasing is altering a circulating token's total supply to satisfy market demand. Instead of employing reserves to keep the peg, it will automatically burn existing tokens or create new ones. They don't have a total supply, and the overall supply fluctuates daily according to market demand. This strategy has proven quite profitable, yet there is no risk of price decreases for consumers, and investors may easily make money and profit.

HOW OUR ECOSYSTEM WORKS?

The financial security of a predetermined daily percent rate (or DPR) of 1.9 percent on your token amount is provided by Magic Ventures. Auto-compounding can result in a maximum theoretical APY of 100,000 percent for the most patient investors. However, we hope to establish a sustainable financial ecosystem for all with our vision for the \$MGV utility in the form of Metaverse, NFT, and Lottery.

"No Buy Tax" and "No Price Decrease each Rebasing" are our primary points. This is not a good thing from giving a high APY. We established two primary issues to ensure that users can purchase our tokens tax-free and that the token price does not decrease due to rebasing.

"Build a Perfect Ecosystem" is one of our primary strategies. BPE strategy is based on two components. The main points are no Whale, No Buy Tax, and Burn Tokens. Unique users cannot manage our liquidity on our sites.

BENEFITS

- No Mint
- No Buy Tax
- No Decrease Price Each Rebasing
- No Black Whales
- High APY
- Perfect Ecosystem(DeFi, NFT, Lottery, Metaverse and more)

FEATURES:

SECURITY MEASURE:

Our platform introduces tax policies and caps to reduce the threat of malignant whales, allowing a broad spectrum of people to participate in our project with confidence. A democratic whale tax exemption scheme exists for some white whales as well. Apart from our tactics, as AVALANCHE C CHAIN operates us, it protects the investment and data confidentiality by a smart contract.

BURNING:

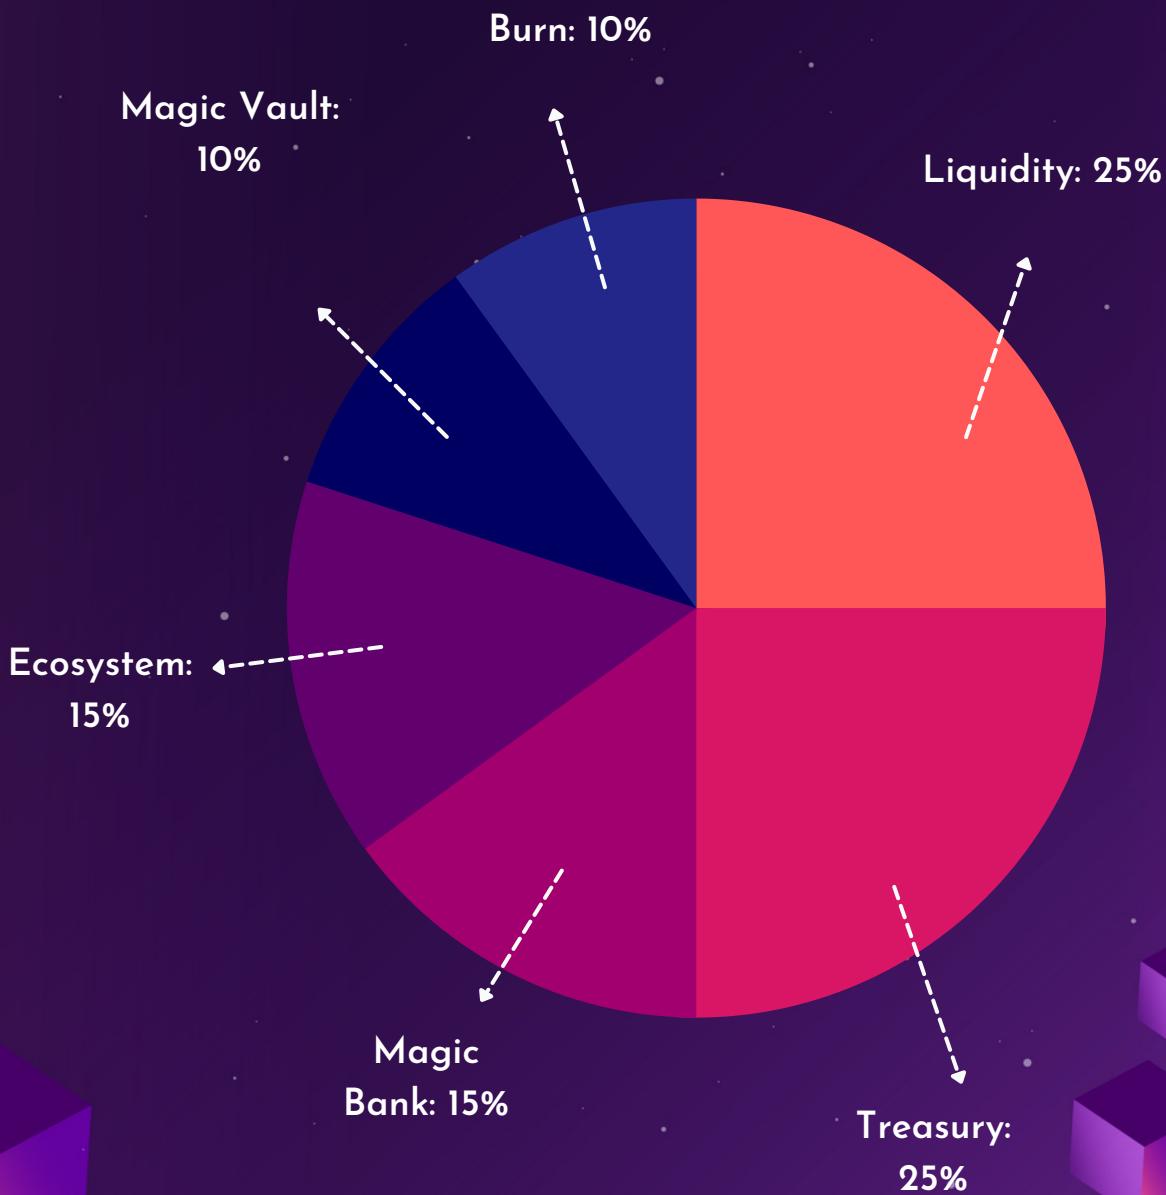

The decision to burn tokens is vested in the developer team of the coin by acting upon the strategy of sending cryptocurrency tokens to a wallet with no access key. We give a certain percentage of the circulating supply in the burning process. Without the private key, these tokens cannot be accessed by anyone and are lost forever. We intend to save our platform from sharks and whales.

NO TAX BUY FEATURE:

Our platform does not have a tax component. Therefore users can obtain or buy tokens without paying taxes. There is no tax to pay while purchasing or investing in Magic Ventures. Only transfer and sell tax will be applied.

OUR MARKETING STRATEGY

PRESALE:

It is also an essential part of this company that, via the phases of its acquisitions, it improves our Platform scope. This presale phase gives financial supporters the most extreme advantages because the costs of the tokens are not higher and will be higher for everyone. \$MGV will be purchased at a fixed price by all our early users, much cheaper than the planned PCS listing price. If all goes well with the digital, this would be profitable for investors and the development team. While the project's developers will receive much-needed funding to complete the project, investors will have the opportunity to purchase an altcoin that might be worth a lot more if the currency succeeds. The liquidity pool size is significant, and we will get enough funds for pooling liquidity on presale. We are going to create initial liquidity with funds from the presale.
